THE CUSTOM LINE OF QUALITY LAMPS

A-23

A Word About Riviera Quality:

Riviera fixtures are made of cast aluminum and stainless steel, — spun and rolled parts are fabricated of prime quality aluminum — anodized to prevent corrosion Painted components are finished with several coats of lacquer — just like your finest car. In other words, Riviera-Lites are engineered, not down to a price, but up to the highest standard of quality.

MISCELLANEOUS

No. 575
POST
5' LONG, 10' CORD

N P Fitter: The Newel Post Fitter finds particular utility on driveway entrance, sea wall and dock posts. It is cast of aluminum, with ample space inside for conduit stub and wire connections. Height 3", with 4⅛" flange, drilled for three anchor screws. This fitter can be furnished, at small additional charge, on all model Riviera-Lites, except 141DP. When ordering, specify the letters "N P", instead of the number following the letter D in the model code. For example, 164D125 with this fitter, would be 164DNP.

N P FITTER

S O Fitter: The S O Fitter is designed for use where it is desired to bring the service leads into the side of the fitter. It is made with ½" threaded side opening. Can be furnished, at small additional charge, on all model 326 and 327C fixtures.
